The top circle is solid orange, while the bottom circle is formed by a dotted orange line. The two circles overlap in the center, creating a shape reminiscent of a Venn diagram or a molecular structure.

KEY TAKEAWAYS

JANUARY

2:13 *Saturn in Pluto (which is like a new moon energetically) is at a conjunction and will define much of the year. This is rare and This hasn't happened since the 1500 and was a pivotal moment in the start of patriarchy. There are karmic things coming up for us this month. There's a redo of that energy this year. There's a lot of institutional energy that is up for review.*

2:47 *In our personal life, this Saturn in Pluto energy is setting the tone for the next 36 years of our life.*

3:53 *Through this review [for the year] we are looking at your deepest soul purpose, the things that are holding you back, and looking at places where structures have been put in place that need to be reevaluated.*

4:08 *From an entrepreneurial perspective, this is about laying foundations for where you want to go next.*

4:20 *This is a year where we are going to have significant retrograde activity, more than usual. We will have our normal retrogrades and Venus (the planet of love and beauty and values) going retrograde From May 13th through June 25; and Mars (the planet of action and how we get things done) going retrograde from September 9th through November 13th. Write these down!*

5:51 *When you're planning your calendar for your business, the middle of May through end of June and September right after labor and through just after the US election season are the two times when you are not going to want to plan your most impactful launches of the year.*

6:28 *If you must launch during this time, give yourself a lot of cushion and scaffolding to prepare for the contraindications of contradictions of this time. Venus rules our money, she's going retrograde. Mars rules our ambition, he's going retrograde. This happens roughly every two years.*

FEBRUARY

6:54 Take note that February is our first mercury retrograde of the year, doing so on the 16th and stays until March 9th. So the time preceding this is no time to procrastinate. Get to work.

8:13 February 2nd is a cross quarter day and is a time to ground and build for what you're moving toward.

8:44 The last two weeks of February and into March you're going to be invited into a soul curriculum of listening to and honoring your intuition. This turns up the volume on your empathy, your passion, spiritual practices. This is a time of review and isn't the best time to start new projects. If new ideas come, don't take them for granted.

9:28 The full moon on February 9th is in Leo, there's a lot of passion vitality and fire and is all about leadership, so we'll feel this on the 8th.

10:17 The new moon on February 23rd and is in Pisces; also close to mercury who's in retrograde. This is a very deeply healing new moon. If you are a healer, you will be busy during this time. This is also a powerful time to set intentions if you're building a healing business. This new moon is setting seeds for who you want to be as a healer. Your breathing exercises will be very important at this time as well.

11:47 The most primary thing to take note of is that we're in Mercury's shadow for most of the month so it's important to take note of any lessons; as Mercury rules communication. Backup technology, double check emails, be conscious of your word choice, tap into your spiritual knowing.

12:41 The best days: Feb 2, 3, 5 (considering how your mindset is serving you). Challenging energy this month is when Venus moves into Aries on Feb 7th. Watch your anger during the month of February (especially on February 10th)

14:05 Sun moves into Pisces on the 18th which is a very critical time for feeling and healing.

14:45 Some positive days for February are the 20th and 21st. The 21st holds a big breakthrough.

15:10 February 25th should be noted on your calendar as one of the hardest days during Mercury Retrograde (take the day off if you can and have a longer meditation session)

MARCH

15:26 *This is a gang busters month. We start the month off in Mercury Retrograde: deep reconciliation of who and what we want and how we express ourselves.*

16:11 *The heavy and dense capricorn energy reaches a next level in March.*

16:34 *The full moon occurs on March 9th at 1:47 pm so we'll begin feeling that energy on the 8th. This full moon in Virgo is all about systems, organization and business and perhaps one of the most important full moons of the year for your business.*

17:10 *Saturn and Pluto are still in close proximity to one another at this time, so this will be an intense time on the geo political stage and an incredibly potent time for our businesses as entrepreneurs to lay structures and foundations for what we want.*

17:47 *This full moon also happens with the Sun next to Neptune (the planet of dreams and illusions), so this is about tapping into your intuition and what you need. So this full moon is not to be missed.*

18:31 *If you don't have a financial team, this is a great time to make those investments. You don't want to wing this tax season or wait until the last minute. Get ahead of your taxes and finances this year.*

19:19 *The New Moon in Aries happens March 24th. Please note that March has some real positive energy this month, as March is like two different years in one month. There are two different eco systems of consciousness this month. Coming in sleeping, tired and dream oriented (with Mercury in Retrograde) and by the end of the month we're in a whole different stratosphere focused on systems and organization. March is a time for buckling down in our business.*

21:03 *We have some of the most pivotal astrological alignments of our lives happening this month, so be aware and come into the month strong.*

21:28 *Mercury stations direct on March 9th, so this is a great time for reviewing where you've been and is also a very pivotal full moon.*

21:52 *March 11th (circle this day). This is a great day to ask for*

what you need, have sales calls and ask for what you want.

22:00 *March 14 more powerful positive growth oriented energy where you're being asked to go for what you want*

22:13 *March 19th the Sun sextiles Saturn is a big game changing positive day. Followed by one of the best days of the year on March 20th where Jupiter and Mars conjoin. Connecting to your ambition and knowing what you want is the energy of the 20th.*

22:41 *March 21st Saturn leaves Capricorn and enters into Aquarius. This is huge. Saturn in Aquarius is like a whole new world and very pivotal (yet subtle) energy.*

23:53 *March 22nd and 23rd take it easy to some degree right before the new moon on the 24th. Tap into your power and your knowing on the 23rd.*

March 27th and 28th, the aspects are really strong and is a great time to get things done. You can get a lot done on March 28th.

25:35 *Aries new moon is the astrological new year. This is the most important new moon of the year.*

27:02 *If you have yet to claim your new year goals, March 24th opens a new chapter and is a good time to set goals. Look at how your pain is giving you capacity as a healer. Let go of ego and look at how life has guided you through unfortunate circumstances. This is a powerful time.*

29:23 *This particular new moon just might be the most pivotal new moon of your lifetime. This is an invitation to reclaim your dreams and desires. This is not to be missed for planting seeds for what you want to see in your life. Your passion and drive will be exalted.*

31:20 *If you're interested in creating a greater community in your business, the cosmic curriculum is coming in to support you in a big way during this new moon time and through the end of the month.*

33:39 *When manifesting with moons, it's not so much about what you do it's who you're being during the moon that vibrates the highest, it's our energetic container. This is about doing more than a ritual, it's about calling yourself home.*

35:31 *List all of your incompletes during the Mercury Retrograde period and then tackle them. This is about atonement on a spiritual level; coming into your biggest energy and becoming*

who you want to be.

36:20 Q1 is about reconciliation. So ground into your power and truth of who we are on an energetic level during the New Moon and carry that energy with you throughout the rest of the year.

37:57 If there are things you're playing small in, handle them before the March 24th New Moon.

38:59 This New Moon is calling in our mission in this life and bringing all things into alignment and will be highlighted on the 25th. Greatest level of integrity and humility as the focus during this time.

APRIL

39:50 This is a sweet spot in early April where there is no retrograde activity. April 7th's full moon is another powerful gamechanging portal for humanity to walk through. Step up in your business in a big way.

41:00 One of the most important days of the year is April 4th. Jupiter and Pluto conjoin in Capricorn. This is a good time to call in money so highlight this time on your calendar which includes the few days before and after and through the full moon on the 7th. This full moon in Libra is about making things happen. While there may be some challenges, this full moon is about embodiment.

42:46 This is a good time to look at partnership and to hold our power. Things can get done during this time.

43:50 Pick your battles wisely during this time as there are things that need to be called out and confronted during this time as well. But the good outweighs the bad

44:27 The new moon in Taurus on April 22nd is about calling in feminine energy, body confidence, planting seeds for abundance and wealth, and stepping into that new realm of abundance.

45:57 April 14th and 28th are challenging days to take feedback seriously. Go over your systems and see how you can do things better. Not a time to push, but to yield

47:19 April 19th the transition from Aries into Taurus feels like a big change in the energetic frequency of the month.

47:32 Pluto stations retrograde on the April 25th which can also feel like a challenging day during the month and can feel

disruptive, so create space around this day.

48:11 *April 26th is all about intuitive insight and a brilliance that comes through.*

MAY

48:51 *Moving into May starts to feel complicated in a new way. Things shift. So take care of business between now and May. Get those biggest things done before May 13th as much as possible.*

50:28 *The middle of may, three months go retrograde (Venus, Saturn, Jupiter) and we will be challenged in how we show up in relationships, with our money, and then on top of all this there are eclipses as we move into June.*

53:14 *Venus is going retrograde in Gemini, and this time is all about our communication, our intellectual knowledge, our groups and friendships. Our job is to be aware during this time.*

53:42 *May 4th is a powerful time to tune into the intellect and knowledge. May 5th is a big day of change. May 9th and 10th are great days to be with community, to have a breakthrough, to batch content, high level romance, to have sex (big sexual energy at this time).*

55:12 *May 12th there is a lot of joy, knowing, and cementing of what you need to know. May 15 is you coming into your power.*

55:33 *May 17th is a time to leverage abundance and growth. The 22nd holds some challenging energy and a very strong potent day.*

56:00 *The full moon in scorpio on the 7th is about calling in your sexuality and sensuality. Also a great time for material wealth and prosperity. This is a great time to work on pelvic floor exercises if you have sexual pain and working on your voice is a good idea at this time.*

57:20 *The new moon in Gemini on May 22nd is a time to take action around writing (blogging, a book, getting bylines, etc.). Surrender is necessary at this time.*

58:45 *Then entering into eclipse season in June...*

59:51 *Jennifer answers a question about a good time for conception during the month of May and conscious conception. Venus in retrograde is a time to call in what you want so get in alignment with the frequency of conception and birth. This*

energy would apply to us all.

JUNE

1:02:28 *This is a month that is hard to predict because of the 2 eclipses. This is a time of sacred feminine coming in. This is a big turning point of the year so carve out time to integrate in June through a day of silence if you can.*

1:04:26 *June 5th there is a full moon in Sagittarius which is all about growth so be the observer and receiver. Carve out space. Do not overbook yourself and under schedule yourself to take things off your plate. Do Less more around this time.*

1:06:05 *Closing out of Q2 and going into Q3 after a new moon we enter into more “mama bear” energy, so call in your feminine egg and yoni energy at this time.*

1:07:48 *This new moon is also about embodiment. June 30th is a powerful day to reclaim your desire for abundance and growth, so mark this day on your calendar.*

1:08:39 *Mars will stay in Aries for the rest of the year, which is unusual. This can feel aggressive energetically and it a big energy for getting things done. Mars is in dignity and can do it’s job during this time. So this is about taking action in no small way. Remember that Mars goes retrograde in September*

JULY

1:09:18 *July 4th eclipse has its own magic, and under scheduling is recommended during this time.*

1:11:41 *July through August are great times for planning and executing. The new moon to full moon at this time holds a lot of hospitable energy. Integrate in July. Reconcile in August. Use the summer months to reconcile.*

1:14:43 *June 17th - July 12th is also a Mercury retrograde.*

1:15:27 *July 15th and 20th might be some of the harder days of the year, so mark those down for awareness. This is a time of alignment and coming into your sense of power, so pay attention to feedback you receive on these days.*

1:16:56 *July 22nd, when the sun is in Leo, this is an invitation to be child-like, to take vacation when you can but mindful of this powerful time for getting things done in business.*

AUGUST

1:24:23 *This month holds an energy of play and connecting to the child-like energy.*

1:25:52 *the August 3rd full moon in Aquarius is about freedom and letting your “freak flag fly.” This is also a time to take action and get things done.*

1:28:11 *The new moon in the middle of the month in August is a strong time to ignite goals and dreams of expanding in leadership in your business. This is a great time to hone your vision for who you want to be in your business and how you want to lead.*

1:29:19 *The new moon of this month is aligning more with grace, and should be marked as the best energy time for the month.*

1:30:18 *August 2nd, 3rd, 10th, and 13 may be challenging with some abrupt energy that is not in alignment with where we are or what you want or need.*

1:31:04 *August 16th, 17th, 18th and 19th leading into the new moon is a very potent time for harvesting and calling forth.*

1:31:54 *The transition from Leo to Virgo during August is abrupt but so needed and craved during this time of year to come back into systems and order.*

1:32:00 *August 25th, 27th, and 29th are potent days of ease and grace.*

SEPTEMBER

1:33:37 *Our need to prove ourselves takes a vacation as we enter September and hit the Mars retrograde (September-November). We are asked why we want what we want and we have to call our attention to “shame-based ambition.”*

1:36:06 *The full moon this month is about connecting with your ambitions and dreams.*

1:37:24 *Fyi, when Mars goes retrograde, it’s important to call in your patience (especially if you’re an Aries).*

1:39:38 *This month has a powerful full moon that kicks off the month and the new moon in Virgo on the 17th which is a time for planting seeds of desire when considering your health, home and routines.*

1:40:47 Sept 14th, a lot can get done under this energy. Sept 3rd, 9th, 28th are also favorite days of the month for getting things done and making commitments.

1:41:37 Challenging energy occurs on Sept 4th, but not too big of a deal to worry about. Sept 15th Venus asks us to own our authenticity.

1:42:07 Sept 21st, 23rd and 24th are not good days for pitching or asking for anything. The sun moving into Libra is a time to pay attention to what we find beautiful; consider your branding, your website, and the visual components of our message and brand.

OCTOBER

1:44:51 Mars is in retrograde the whole month.

A challenging day is the 4th (buckle up your seatbelt for turbulence and some aggressive energy) So go slow at the start of this month. The first week of October has a lot of power dynamics at play.

1:46:02 This is a time to be kind and compassionate with yourself and your schedule, and make this a time for planning and creation and not about revenue generating. Not a good month to push to call in money.

1:48:02 October 12th, 19th, 21st and 24th have the strongest energy of the month.

148:27 October 22nd we go into a deep dive into reconciling and reclaiming our light from the shadow.

1:49:02 October 25th is the most difficult day during the retrograde, so take it easy if possible that day.

NOVEMBER

1:49:50 The payoff comes in November. November 12th especially, which is about wealth and consolidating our power. **THIS IS THE MOST POWERFUL DAY OF THE WHOLE YEAR.**

1:50:59 November 13th we've had some time to bounce back after election season and stepping into the other side of the powerful energetic day of the 12th.

1:52:41 We close out the year in eclipse season.

1:53:36 The great conjunction, which only happens every 20 years, occurs at the end of November and starts a new chapter

so that we start 2021 on a whole new footing.
